
Feedback Report – Simplify Money App

To understand the usability of the Simplify Money app, I shared the app with three of my friends and asked them to explore its features and provide honest feedback about their experience. Below is a summary of their opinions, including what they liked and what they felt could be improved.

Friend 1: Raunak

Raunak explored the app mainly to understand how it helps track finances and investments. He felt that the **main idea of the app is very useful**, especially for students or beginners who want to understand their money better.

Positive Feedback

- The dashboard gives a quick overview of financial information.
- The app design looks modern and clean.
- It seems helpful for tracking savings and investments in one place.

What He Did Not Like

- Some sections were not very clear for first-time users.
- Too much information on the dashboard made it slightly confusing.
- It took some time to understand where to check specific details.

Suggestion

Raunak suggested adding a **short tutorial or onboarding guide** for new users so they can easily understand the app.

Friend 2: Priya

Priya tested the app from the perspective of someone who already manages her finances regularly. She liked the idea of having a **single platform to track financial information**.

Positive Feedback

- The interface looks simple and professional.
- It provides a good overview of financial data.
- Useful for setting financial goals and tracking money.

What She Did Not Like

- Navigation between different sections felt slightly confusing.
- Some screens took time to load.
- She expected more explanations about investment options.

Suggestion

Priya suggested improving **navigation flow and adding short explanations for financial terms** to make the app easier to understand.

Friend 3: Aman

Aman focused more on the technical aspects and compared the app with other finance apps available in the market.

Positive Feedback

- The concept of simplifying financial management is strong.
- The UI looks good and modern.
- It could be useful for people starting their investment journey.

What He Did Not Like

- Some features felt basic compared to other finance apps.
- The app could provide more insights about spending or investments.
- Limited customization options.

Suggestion

Aman recommended adding **smart insights or personalized recommendations** to help users make better financial decisions.

Overall Conclusion

After collecting feedback from three different users, the general opinion was that the **Simplify Money app has a good concept and clean interface**, but it can improve in terms of **user guidance, navigation clarity, and advanced financial insights**. Adding tutorials, improving app performance, and providing more personalized recommendations could significantly enhance the overall user experience.
